

Mud Glorious Mud

The project provided children with opportunities to plan and build their own mud play kitchen from scratch. They were given the autonomy to bring their ideas to life.

1) For children, by children

Children set up a Mud Kitchen suitable for all children in the centre.

2) Develop confident children

Children grew more confident as they engaged in messy play and free expression with mud.

3) Develop critical thinkers

By cooperating with each other to solve problems, children learn to consider different perspectives and points of view. They also learn to observe, analyse, and communicate their ideas.

4) Ownership of learning

Being naturally curious, children took the lead to construct their own learning through self-initiated research, experiments, and investigations. Teachers were at hand to guide and assist as and when requested by children.

✦ How is this Project Sustained? ✦

Mud is for everyone!

Apart from the Mud Play Kitchen, mud play opens up several learning opportunities and allows children of all ages to express themselves freely. They learn about the composition of mud. Through the integrated curriculum, the children can continue to explore its benefits and uses.
